

SITE TOUR HAZARD NOTIFICATION

As a visitor you may encounter various hazards throughout the tour. For your own personal protection and for the safety of others, be aware of the following hazards and adhere to all safety guidelines while on the site tour at:

Nucor – 4700 Engineers Way, Suite #103, North Las Vegas NV 89081

1. **Moving equipment hazards** – There are many types of vehicle traffic and powered equipment that you may encounter inside and outside of the facility such as: trucks, straddle lifts, boom cranes, forklifts, overhead cranes, etc. Be alert, use caution, make sure the operator knows you are in the vicinity and has visual contact with you. The equipment needs room to operate and has a very large turning radius. Stay clear of this equipment and do not stand near the wheel area.
2. **Moving machinery hazards** – Stay clear of moving machinery such as motors, conveyors, fans, etc.
3. **Suspended loads** – At no time is an individual allowed to stand, walk underneath or put any part of their body under a suspended load unless the load is positioned above rigid support stands.
4. **Head Injuries, Hearing Protection & Foreign objects in the eye(s)** – Hardhats and safety glasses are required at all times. Wear hearing protection as specified by the location that you are visiting.
5. **Foot injury hazards** – Work boots and/or closed toed shoes are required for access due to potential foot injuries. Contractors should wear good work boots and visitors should wear closed toed shoes.
6. **Tripping and falling hazards** – Exercise extreme care when walking in work areas and stepping over or around obstacles such as wire mesh or rebar. If working from heights, appropriate fall protection should be utilized.
7. **Welding flash burns** – Avoid areas where welding or burning operations are conducted. Do not look at the welding flash.
8. **Fire hazards** – Do not smoke or use flame-producing devices around any flammable or explosive substance.
9. **Electrical hazards** – Stay clear of all electrical transmission, distribution and control equipment.
10. **Acid Etching** – Do not walk through or perform work in the etching area while acid is being used.
11. **Chemicals** – There are various types of chemicals that are used and stored throughout the facility. Do not use or handle chemicals unless you have been trained to the specific hazards and handling methods. Please observe all appropriate safety precautions when working with or around chemicals.
12. **General awareness and avoidance statement:** DO NOT pass through or work in areas where operations are taking place. Pay attention to any visible or audible signals potentially noting active operations and potential hazards.

I, _____, hereby acknowledge that I have read this hazard notification and that I fully understand the potential hazards at this facility and the associated safety precautions that should be observed. I will take responsibility for my personal safety and will hold Structural Engineers Association of Southern Nevada (SEASoN) blameless of any injuries that I may incur due to my own fault or negligence.
